

Laboratory Testing

The doctor usually tries to obtain the needed objective information using laboratory tests covered by your insurance. However, if a holistic laboratory test is necessary, then there will be a holistic laboratory testing fee of \$30.00 per kit when the kit is given out from our office. If the doctor wants to order any holistic laboratory tests which require a testing kit at your initial appointment, you will be informed again in our office of the associated fee.

There may be, in addition, a drawing and handling fee charged by the laboratory for blood draws.

Please sign the bottom of the advanced beneficiary agreement and return it to our office acknowledging that you have been informed of the holistic laboratory fees.

You will be given copies of your laboratory reports at the follow-up visits.

We look forward to seeing you at your upcoming appointment.
